

Shropshire Sumdog Competition

START DATE: 30th September END DATE: 6th October

To take part, play Sumdog's free math games. In each game, you need to answer maths questions to make progress. You can choose which game you play, while Sumdog automatically adapts its questions. Each correct answer you give counts toward your score.

During the contest period, pupils who are entered will see the contest activity on their homepage. Any games you play when this is showing will count towards your score.

Classes are ranked on the average number of correct answers. At least 5 pupils from a class need to play in the contest for it to appear on the leader board. The more players, the more chance your class has of winning the competition.

Each pupil who answers 100 questions, will be rewarded with a free item for their Sumdog House and 10 merits from their class teacher.

There are also certificates and coins up for grabs for daily winners so log in and get playing.

Good luck!

Miss Worley
